

KABIR SINGH MARWAHA

Levittown, New York | (917) 513-3731 | Kabir_1_6@icloud.com

EDUCATION

New York Institute of Technology

Bachelor's of Computer Science and concentration in AI

Old Westbury, NY

Expected May 2027

- Relevant Coursework: Data Structures, Design and Analysis of Algorithms, Operating Systems, Theory of Computation, Computer Networks, Database Management, Artificial Intelligence, Software Engineering

EXPERIENCE

Apple

Manhasset, NY

Product Zone Specialist

July 2026 - Present

- Guide customers toward Apple products, accessories, and services that fit their needs through personalized product conversations.
- Demonstrate product capabilities and apply product knowledge across Apple hardware, accessories, and services to help customers compare solutions confidently.
- Maintain a customer-ready product zone and collaborate with store teammates to deliver a seamless in-store experience.

Goldfish Swim School / Boardman Bay Capital Management

New Rochelle, NY

Data Analyst & Software Engineering Intern

June 2026 - August 2026

- Built and launched an automated Aged Accounts workflow to streamline account reporting and reduce manual processing.
- Developed an Absence Report automation across three locations, integrating IClassPro, Excel reporting, Gmail outreach, and Podium messaging.
- Created and deployed a live centralized reporting hub; researched AI-enabled process improvements and integrated Grok into an internal Boardman Bay system.
- Partnered with operational stakeholders to identify workflow bottlenecks and translate manual reporting and outreach tasks into maintainable automations.

All Scientific Technology Group, LLC

New Hyde Park, NY

Software Engineering Intern

July 2025 - December 2025

- Contributed to the development and deployment of an RFID-based asset tracking system by integrating RFID hardware with internal software for real-time tracking and management of medical equipment.
- Assisted in implementing and improving software functionality for inventory monitoring, data accuracy, and equipment lifecycle management across healthcare environments.
- Collaborated with cross-functional engineering and field teams to test, validate, and deploy software-hardware solutions at large New York City healthcare facilities.

New York Institute of Technology

Old Westbury, NY

Software Engineering Project Lead

April 2025 - July 2025

- Designed and developed PolyDB, a full-stack JavaFX and JDBC application enabling unified management of PostgreSQL, MySQL, and Oracle in a single interface.
- Implemented GUI-driven CRUD operations, dynamic table rendering, and schema inspection, improving database workflow efficiency by approximately 40% for student research projects.
- Built a modular JDBC data-access layer for multi-database connectivity through a single authentication and configuration system, eliminating 400+ lines of duplicated connection logic.

CVS

Syosset, NY

Pharmacy Technician

July 2024 - November 2025

- Processed prescriptions, maintained patient profiles, and helped ensure regulatory compliance using pharmacy software.
- Assisted with inventory management by tracking stock levels and handling medication orders efficiently.
- Resolved prescription issues with providers and insurers while supporting inventory and medication-order workflows.

Starbucks

Levittown, NY

Barista

June 2022 - July 2024

- Prepared customized beverages and processed high-volume point-of-sale transactions, handling \$1,000+ in daily cash.
- Supported a 30+ person team across customer service, restocking, cleaning, and peak-hour operations.
- Maintained product knowledge across 100+ drinks and 30 food items while delivering consistent customer service.

PROJECTS & PROFESSIONAL DEVELOPMENT

New York Institute of Technology - Badminton Club

Old Westbury, NY

Founder and President

September 2024 - Present

- Founded and lead a student organization, managing logistics, resources, and cross-team coordination.
- Oversaw budgeting, scheduling, and procurement while working with campus stakeholders.

Applied Software Engineering Program

Levittown, NY

Programmer

September 2022 - May 2023

- Built a full-stack platformer application end-to-end in a team-based, time-constrained hackathon using Python and Java.
- Designed and implemented core system components using iterative development, debugging, and collaborative version-control practices.

SKILLS

Technical: Python, Java, SQL, HTML, CSS, JavaFX, JDBC, Git, Excel, Gmail, Podium, IClassPro, RFID systems

Focus Areas: Automation, AI/LLM integration, data analysis, systems integration, reporting, process improvement

Practical: Communication, leadership, multitasking, teamwork, flexibility
